PERFORMANCE, REFINED

Four wavelengths. One complete platform.

SilkLase combines four diode wavelengths in a provider-focused system built for efficient, versatile hair-reduction treatments.

01 Broad treatment versatility

Four wavelengths support a wider range of follicle depths, treatment areas, hair profiles and skin types.

02 Fast coverage

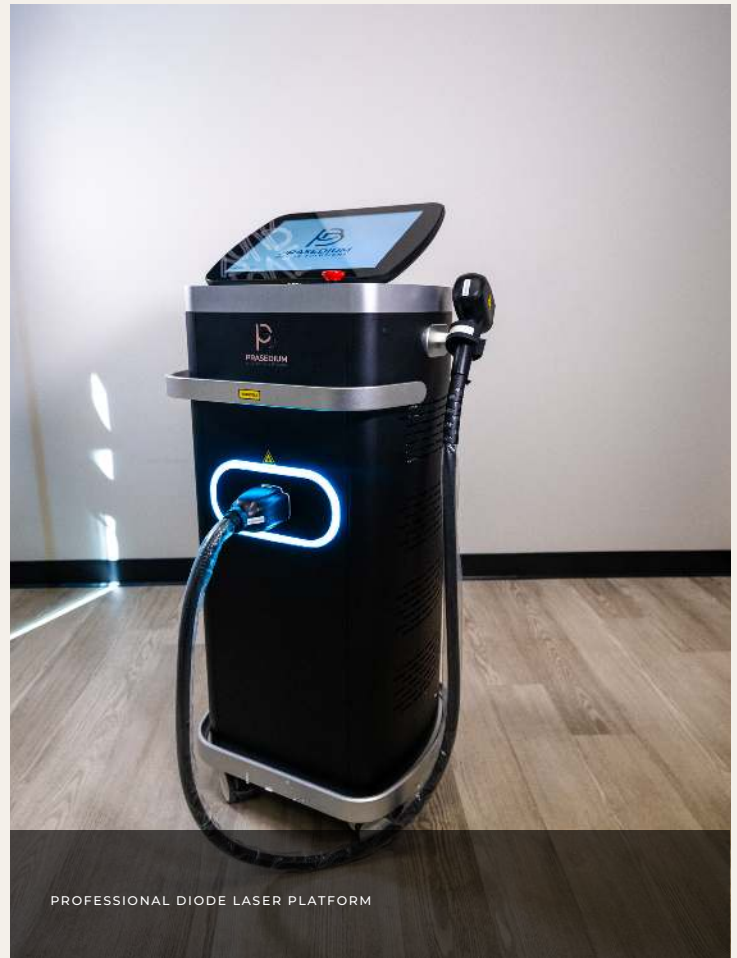

A 12 × 20 mm spot helps providers move efficiently across larger areas.

03 Provider-focused ergonomics

A lighter 1.5 lb applicator is designed to feel more manageable through a full treatment day.

04 Guided workflow

An intuitive interface includes treatment-area shot tracking and system safeguards.

DEVICE SOLUTIONS

ENGINEERED DEPTH

Built wavelength by wavelength.

Each wavelength interacts with the follicular target at a different relative depth, giving trained providers more flexibility in treatment planning.

755

SUPERFICIAL PRECISION

More superficial penetration for shallower follicles and finer treatment areas such as the upper lip.

808

EVERYDAY VERSATILITY

Balanced absorption and deeper follicular reach for efficient, high-repetition treatment.

940

VASCULAR SUPPORT

Targets microvessels surrounding the follicle to help reduce its nutrient supply.

1064

DEEPEST REACH

The deepest penetration of the four wavelengths for deeply embedded hair.

Treatment settings, wavelength selection and patient suitability must be determined by a properly trained professional in accordance with the device protocol.

THOUGHTFUL BY DESIGN

Designed around the provider.

From the treatment window to the interface, the system is configured to support a smoother room-to-room workflow.

01

Large treatment window

The 12 × 20 mm spot supports efficient coverage across larger treatment zones.

02

Lighter applicator

At approximately 1.5 lb, the applicator is designed with provider handling in mind.

03

Tapered precision

A tapered tip makes it easier to access smaller or more contoured treatment areas.

04

Intelligent interface

Built-in safeguards and six-area shot tracking help guide system operation.

TREATMENT VERSATILITY

From targeted areas to full-body programs.

SilkLase supports a flexible service menu across commonly requested treatment areas.

BUILD THE PROGRAM AROUND YOUR PRACTICE.

Prasidium supports device selection, provider training and implementation planning for the way your team works.

Treatment times, pricing, patient eligibility, outcomes and program economics vary by protocol, market and practice.

PRACTICE POTENTIAL

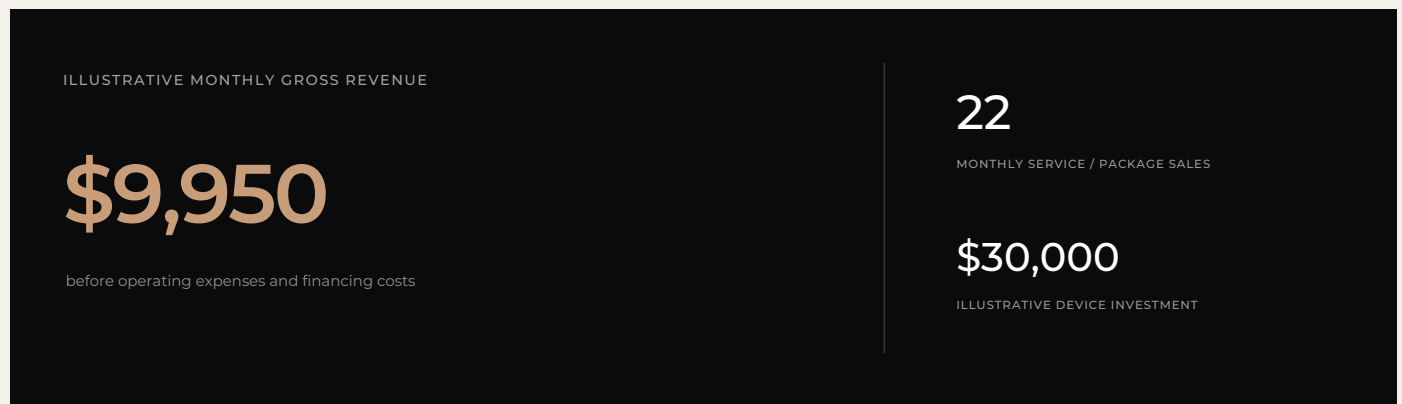

One room. More possibilities.

Built to support professional hair-reduction services and skin-rejuvenation protocols.

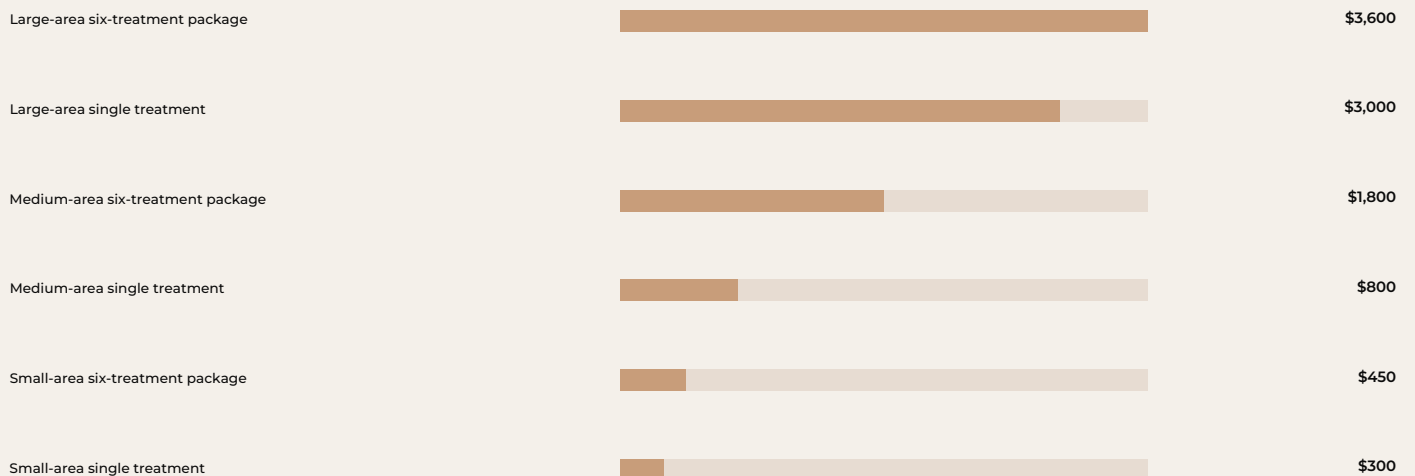

ILLUSTRATIVE PRACTICE POTENTIAL

A manageable monthly service mix.

This scenario applies the supplied prices and monthly sales assumptions consistently across each listed service or package.

GROSS-REVENUE CONTRIBUTION

SCENARIO BOUNDARIES

Gross revenue only. Staffing, consumables, overhead, discounts, cancellations, taxes and financing costs are excluded. Actual pricing, volume and results vary.

TRANSPARENT ASSUMPTIONS

The scenario, line by line.

Each line uses the stated illustrative price multiplied by the assumed number of service or package sales in one month.

SERVICE OR PACKAGE	PRICE	SALES / MO.	GROSS REVENUE
Small-area single treatment	\$100	3	\$300
Small-area six-treatment package	\$450	1	\$450
Medium-area single treatment	\$200	4	\$800
Medium-area six-treatment package	\$900	2	\$1,800
Large-area single treatment	\$300	10	\$3,000
Large-area six-treatment package	\$1,800	2	\$3,600
ILLUSTRATIVE TOTAL		22	\$9,950

MODEL NOTE

Package counts represent package sales, not individual completed sessions. This illustration is not a forecast, guarantee of demand, or representation of profit. Practices should replace every input with their own pricing, capacity and cost assumptions.

YOUR NEXT DEVICE, CONSIDERED

Bring precision into your practice.

SilkLase configuration, availability, training and implementation support can be tailored to the needs of your practice.
