ALL-IN-ONE FACIAL CARE

Layered modalities. One complete workflow.

HydroLisse combines cleansing, exfoliation, infusion, temperature control and energy-based modalities in one adaptable facial platform.

01 Deep-cleansing foundation

Hydrodermabrasion and vacuum-assisted exfoliation help remove surface debris and prepare the skin.

02 Customizable layering

Multiple handpieces let trained providers sequence modalities around treatment goals and skin presentation.

03 Conditioning and infusion

Oxygen, iontophoresis and ultrasound options support a hydration- and nourishment-focused experience.

04 Practice-ready system

An integrated touchscreen, solution bottles and mobile base keep tools organized in a single platform.

A LAYERED FACIAL PROTOCOL

More modalities, thoughtfully sequenced.

HydroLisse gives trained providers a flexible set of tools that can be combined or selected individually according to treatment goals and skin assessment.

HYDRO CLEANSING + EXFOLIATION

Vacuum-assisted fluid delivery supports surface cleansing, exfoliation and pore-focused preparation.

ENERGY RF + ULTRASOUND

Multipolar RF and ultrasound are positioned for skin-conditioning, texture and product-absorption protocols.

INFUSION ION + OXYGEN

Iontophoresis, an oxygen jet and oxygen-bubble treatment broaden serum and oxygen-focused service options.

THERMAL COOLING + HEATING

A temperature-controlled handpiece can be used within protocols for pore preparation and post-treatment comfort.

Modality selection, product compatibility and patient suitability must be determined by a properly trained professional using current device labeling and protocols.

EVERYTHING WITHIN REACH

A complete facial station.

An organized console brings the display, solution management and handpieces together for a streamlined treatment-room setup.
